

# OIML International Recommendation R 76-1

Non-automatic weighing instruments (NAWI)

Introduction to R76-1 (2006)

---

---

---

---

---

---

---

## DISCLAIMER

- This presentation has been designed as an introduction to *OIML R 76-1 Non-automatic Weighing Instruments, Part 1: Metrological and Technical Requirements — Tests*, Edition 2006(E) published by the International Organisation of Legal Metrology (OIML).
- The presentation is a summary of many of the requirements and as such may not be complete.
- In all cases R76-1 takes precedence over this presentation.

Recommendations		Documents	Vocabularies	Basic Publications	Expert Reports	Guides	Seminar Reports
Ref.		Recommendations (127)					
R 7 - en		Clinical thermometers, mercury-in-glass with maximum device					
R 14 - en		Polarimetric saccharimeters graduated in accordance with the ICUMSA International Sugar Scale					
R 15 - en		Instruments for measuring the hectolitre mass of cereals					
R 16-1 - en		Mechanical non-invasive sphygmomanometers					
R 16-2 - en		Non-invasive automated sphygmomanometers					
R 18 - en		Visual disappearing filament pyrometers					
R 21 - en		Taximeters. Metrological and technical requirements, test procedures and test report format					
R 22 - en		International alcoholometric tables					
R 23 - en		Tire pressure gauges for motor vehicles					
R 24 - en		Standard one metre bar for verification officers					
R 26 - en		Medical syringes					
R 34 - en		Accuracy classes of measuring instruments					
R 35-1 - en		Material measures of length for general use. Part 1: Metrological and technical requirements					
R 35-2 - en		Material measures of length for general use. Part 2: Test methods					
R 35-3 - en		Material measures of length for general use. Part 3: Test report format					
R 40 - en		Standard graduated pipettes for verification officers					
R 41 - en		Standard burettes for verification officers					
R 42 - en		Metal stamps for verification officers					
R 43 - en		Standard graduated glass flasks for verification officers					
R 44 - en		Alcoholometers and alcohol hydrometers and thermometers for use in alcoholometry					
R 47 - en		Standard weights for testing of high capacity weighing machines					

## Non-automatic weighing instrument

Instrument that requires the intervention of an operator during the weighing process to decide that the weighing result is acceptable.

- adjust the load
- adjust the unit price

In case of doubt as to whether an instrument is a non-automatic weighing instrument or an automatic weighing instrument, the definitions for automatic weighing instruments given in OIML Recommendations R 50, R 51, R 61, R 106, R 107 and R 134 have higher priority.

## Self Indicating Graduated NAWI

**Semi-Self Indicating Graduated NAWI**

---

---

---

---

---

---

---

**Non self indicating Non graduated NAWI**

---

---

---

---

---

---

---

**Non self indicating NAWI**

---

---

---

---

---

---

---

## Digital self indicating NAWI

---

---

---

---

---

---

---

---

## Layout

The document is made up of:

- Chapter T Terminology
- 6 Sections
  1. Scope
  2. Principles
  3. Metrological requirements
  4. Technical requirements for a self or semi-self indicating instrument
  5. Technical requirements for electronic instruments

---

---

---

---

---

---

---

---

## Layout

- 6. Technical requirements for non self indicating instruments
- 7 Annexes
  - Annexes are mandatory
  - Cover test procedures and compatibility checking

---

---

---

---

---

---

---

---

## Terminology

The terminology given in chapter T Terminology is a binding part of the Recommendation

---

---

---

---

---

---

---

## Scope

### 1 Scope

- This Recommendation specifies the metrological and technical requirements for non-automatic weighing instruments that are subject to official metrological control.
- It is intended to provide standardized requirements and testing procedures to evaluate the metrological and technical characteristics in a uniform and traceable way.

---

---

---

---

---

---

---

## Units of measurement

### Units of measurement

The units of mass to be used on an instrument are:

- the kilogram, kg;
- the milligram, mg;
- the gram, g; and
- the tonne, t.

---

---

---

---

---

---

---

## Units of measurement

### Units of measurement

- For special applications, e.g. trade with precious stones, the metric carat (1 carat = 0.2 g) may be used as the unit of measurement. The symbol for the carat is ct.

---

---

---

---

---

---

---

## Principles of the metrological requirements

The requirements apply to all instruments irrespective of their principles of measurement.

Instruments are classified according to:

- the verification scale interval, representing absolute accuracy; and
- the number of verification scale intervals, representing relative accuracy.

---

---

---

---

---

---

---

## Principles of the metrological requirements

The maximum permissible errors are in the order of magnitude of the verification scale interval.

They apply to:

- gross loads
- net loads when a tare device is in operation
  - They do not apply to calculated net values when a pre-set tare device is in operation.

---

---

---

---

---

---

---

### Principles of the metrological requirements

- A minimum capacity (Min) is specified to indicate that use of the instrument below this value is likely to give rise to considerable relative errors.

---

---

---

---

---

---

---

---

### Application of requirements

The requirements of the R 76-1 apply to all devices performing the relevant functions, whether they are incorporated in an instrument or manufactured as separate units.

- Examples are:
  - load-measuring device;
  - displaying device;
  - printing device;
  - preset tare device; and
  - price-calculating device.

---

---

---

---

---

---

---

---

### Application of requirements

#### National legislation

Devices that are not incorporated in the instrument may be exempted from the requirements for special applications.

---

---

---

---

---

---

---

---

---

---

---

---

---
