Schedule

Start: October 2019

End: December 2019

Fees

Free participation for labs located in GCC countries

Comparison Test Item

Potable water

Benefits of Participation

- ✳ Improve the performance of the test laboratory
- ✳ Compare methods and procedures
- ✳ Assure the quality testing results
- ✳ Satisfy regulators and Accreditation Bodies

How the Program Works

- ✳ Register on the link: <https://bit.ly/2JHEZIC> and provide some general information regarding your capabilities in terms of testing.
- ✳ Once the total number of participant laboratories is confirmed, a schedule is established and communicated to those laboratories along with a detailed protocol of the program.
- ✳ Participants will receive homogenous Proficiency Testing item that accompanied with protocol proficiency testing.
- ✳ Each participant performs the testing according to the internal procedure in laboratory or standard method at pre-determined schedule as mentioned in the protocol.
- ✳ The participant shall submit the testing result to GSO using form in the protocol.
- ✳ The participant's data performance will be evaluated by statistical analysis according with ISO 13528.
- ✳ PT program on potable water report will be shared by GSO to the participants with confidential code for each participant.
